Summary

AI Engineer with hands-on experience building enterprise AI applications, AI agents, real-time Voice AI systems, and workflow automation platforms. Developed production-ready solutions integrating **Groq LLaMA**, **Whisper**, Microsoft Graph API, Google Workspace APIs, PostgreSQL, and Odoo CRM, including a multi-tenant e-Invoicing platform processing **2,000+ documents/month**. Strong in **Python**, **SQL**, Prompt Engineering, API integration, and enterprise automation.

Key Skills

Languages: Python, SQL

Artificial Intelligence: Large Language Models (LLMs), AI Agents, Prompt Engineering, RAG, Voice AI, Groq LLaMA, Whisper

Frameworks & Libraries: Pipecat, Streamlit, Pandas, NumPy, OpenPyXL, python-docx

Enterprise APIs: Microsoft Graph API, Google Drive API, Google Sheets API, REST APIs, OAuth 2.0

Cloud & Databases: PostgreSQL, MongoDB, AWS (EC2, S3), Odoo CRM

Data Engineering: ETL Pipelines, PDF/Excel → JSON, Schema Mapping, Data Validation, Workflow Automation

Visualization & Tools: Power BI, Tableau, Git

Experience

Envision Beyond, Bengaluru

June 2025 – Present

- Built enterprise AI applications that eliminated manual workflows and improved operational efficiency across invoice processing, sales automation, and customer support.
- Led development of a **multi-tenant e-Invoicing automation platform** processing **2,000+ financial documents/month** through automated extraction, validation, transformation, and regulatory submission.
- Engineered an end-to-end enterprise automation workflow integrating **Microsoft Graph API**, **PostgreSQL**, and **Odoo CRM** to automate email ingestion, lead management, customer data synchronization, and business workflows.
- Owned end-to-end digital marketing, SEO, and content strategy, generating qualified inbound leads within **30 days** and achieving first-page Google rankings for targeted commercial keywords within **2 months**.
- Developed **SQL-backed Power BI dashboards** tracking operational KPIs, automation performance, and business insights for stakeholders.

Spire Technologies, Bengaluru

Data Analyst Consultant

Sept 2024 – Jan 2025

- Built Python–SQL data pipelines processing **100K+ records**, improving data quality and downstream analytics.
- Developed Power BI dashboards for recruitment analytics, reducing reporting turnaround by **15%**.
- Optimized MongoDB data processing workflows using Python and AWS to improve analytics performance.

Projects

Real-Time Voice AI Assistant (Aria) (*Python, Pipecat, WebRTC, Groq, Whisper, ElevenLabs*)

Engineered a low-latency conversational Voice AI assistant using **Pipecat**, **WebRTC**, **Groq Whisper**, **Groq LLaMA 3.1**, and **ElevenLabs**. Implemented intelligent interruption handling, dynamic knowledge-base integration, domain-specific speech recognition, and resilient failover mechanisms for natural real-time conversations.

AI Lead Generation & Sales Automation Agent *(Python, Microsoft Graph API, Groq LLaMA, PostgreSQL)*
Built an enterprise AI-powered sales automation platform integrating **Microsoft Graph API**, **Groq LLMs**, and **PostgreSQL** to automate inbound email processing, company research, personalized email generation, Outlook draft creation, and response tracking.

Automated Multi-Tenant e-Invoice Processing Pipeline *(Python, Microsoft Graph API, OAuth 2.0, REST APIs)*
Developed an enterprise ETL platform automating invoice, credit note, and debit note processing across multiple business tenants. Integrated **Microsoft Graph API**, automated PDF/Excel extraction, JSON transformation, and Malaysian LHDN e-Invoice compliance workflows.

AI Content Generation & SEO Automation Platform *(Python, Google Workspace APIs, python-docx)*
Developed an AI-assisted content automation platform integrating prompt engineering with deterministic validation. Automated document generation, quality validation, Google Drive publishing, Google Sheets synchronization, and workflow orchestration for enterprise content operations.

Certifications

Google Data Analytics (Coursera) • HackerRank: Python & Problem Solving

Education

MVJ College of Engineering , Bengaluru	
B.E. in Computer Science (Data Science)	2020 – 2024
CGPA: 7.73
